## Our Speaker

**Dr. Pádraig Egan**

BVM&S CertAVP (GSAS) DipECVS MRCVS

**EBVS® European Specialist and RCVS Specialist in Small Animal Surgery**

Pádraig Egan graduated from veterinary school in 2007 and began his career at a charity clinic, gaining early experience that was followed by roles as a mixed-practice veterinarian and an emergency and critical care clinician. These foundational positions provided him extensive clinical exposure across various veterinary disciplines, honing his skills and deepening his commitment to patient care.

Driven by a dedication to surgical excellence, Pádraig completed a rigorous surgical internship and residency at Fitzpatrick Referrals in the UK, culminating in the award of his Surgical Diploma from the European College of Veterinary Surgeons in 2019. This achievement earned him dual recognition as an EBVS® European Specialist and an RCVS Specialist in Small Animal Surgery. Today, he serves as Clinical Director at East Neuk Veterinary Clinic, leading a team focused on advanced surgical care.

Throughout his training, Pádraig published extensively on the management of osteochondral defects in dogs and continues to contribute to research on orthopaedic diseases in both canine and feline patients. While he enjoys all aspects of small animal surgery, his primary clinical interests include the management of canine cruciate disease and the use of minimally invasive arthroscopic techniques.

Beyond his clinical and research contributions, Pádraig is dedicated to advancing veterinary education. He lectures widely across Europe, sharing his expertise in small animal orthopaedics with colleagues and aspiring specialists. As part of his commitment to the profession, he also mentors the next generation of veterinary surgeons through a residency program accredited by the European College of Veterinary Surgeons, where he guides and develops future specialists in small animal surgery.

Outside of his professional responsibilities, Pádraig enjoys spending time with his two young children and his two lively Dachshunds, who bring equal joy and energy to his home life.

### Dr. Kunal Dev Sharma

With a career spanning two decades, Dr. Kunal Dev Sharma has not only revolutionised the field of veterinary surgery but has also made significant strides in the business aspect of animal healthcare. As a director of MaxPetZ, his journey has been marked by remarkable achievements and a relentless commitment to improving the lives of pets and their owners.

Dr. Kunal Dev Sharma's roots in veterinary care run deep. He hails from a family of veterinarians and his father and grandfather pioneered the first private veterinary clinic in Old Delhi in 1952. He worked in South east Asia as a small animal veterinarian for 2 years and then went on to get a prestigious membership in the Royal College of Veterinary Surgeons, UK- a testament to his dedication and expertise. He has earned an advanced masters in small animal surgery.

His keen interest in orthopaedics was nurtured during his tenure at an orthopaedic referral hospital in the UK in the late 2000s. Over the years, he honed his skills, specialising in neurology and orthopaedics, and garnered a reputation as a leading expert in spinal and trauma surgeries.

Dr. Sharma's commitment to excellence is further evidenced by his active involvement in international veterinary orthopaedic communities, including memberships in AO Vet and the European Society of Veterinary Orthopedics and Traumatology. Earlier in his career, Dr.

Sharma also earned an advanced masters in small animal surgery. Dr. Sharma's journey is studded with numerous milestones. With close to two decades of experience across India, the UK, Malaysia, and Australia, he has performed a diverse range of minimally invasive procedures, orthopaedic surgeries, and spinal surgeries. His dedication to his patients is evident as he travels across the country to perform complex surgeries, witnessing firsthand the remarkable recoveries and improved quality of life of his furry patients.

Notably, Dr. Sharma's name finds a place in the Limca Book of Records for conducting India's first Pacemaker implantation surgery in a dog suffering from complete heart block. Additionally, Dr. Sharma has been recognised for conducting the first brain surgery in a dog in India. These groundbreaking achievements showcase his unwavering commitment to pushing the boundaries of veterinary medicine.

Dr. Sharma embarked on his journey with Max Vets in the mid-2000s, and his vision for the company is nothing short of inspiring. He aspires to transform MaxPetZ into India's leading pet healthcare and wellness brand, with a particular focus on veterinary neurology and orthopaedics. Moreover, his passion extends to nurturing the next generation of veterinary doctors by creating defined career paths and providing mentorship and training opportunities.

## Lectures

- **Types of Anemia, Clinical Haematology and Biochemistry Interpretation in small animals**
- **Canine & Feline Blood Groups, Cross Matching, Phlebotomy procedures & safe blood transfusion practices**

## Our Speaker

**Prof (Dr) Baranidharan G.R.**  
PGRIAS, Tamil Naidu Veterinary & Animal Sciences University ( TANUVAS)

Dr Baranidharan G.R. received his veterinary degree (1997), Masters (2000) and Ph.D (2015) in the field of Veterinary Internal Medicine from Madras Veterinary College, Tamil Nadu Veterinary Animal Sciences University, Chennai. He did a stint of clinical training in canine diagnostic imaging techniques including CT/ MRI and ultrasound during July 2012 at the Ohio Veterinary Medical Center, Ohio college of Veterinary medicine, Columbus, U.S.A under Dr Guillermo Couto.

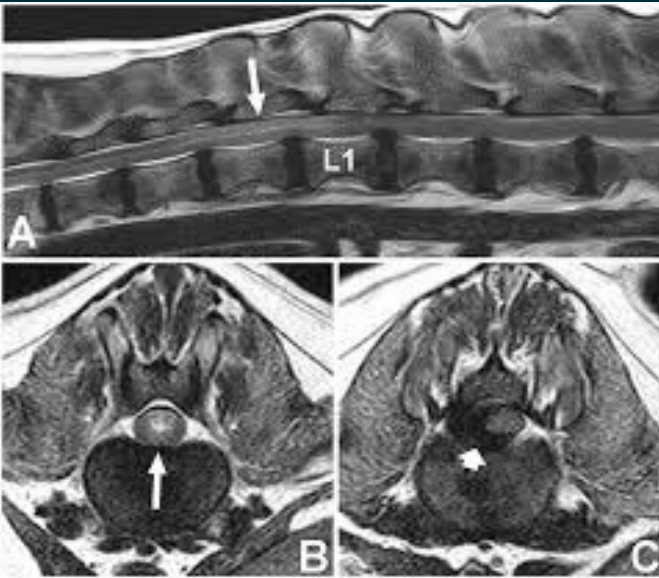

He has conducted hands on workshops in Abdominal Ultrasound for the small animal practitioners and guided PG Diploma courses PGDUSS @ Madras Veterinary College, TANUVASTamil Nadu. He has participated in Esoate Vet Academy ultrasound webinars during 2018-19. He has tutored small animal practice veterinarians on imaging abdominal small and large organs including knobology, probes/ transducers, peritoneal cavity, kidneys & urinary bladder, liver, pancreas, lymph nodes, spleen, uterus, ovaries, prostate and ultrasound guided biopsy techniques. He has published international articles on Ultrasonography Of Adrenal Glands In Normal And Hyperadrenocorticoid Dogs., International Journal of Current Research. 2015. He is currently a faculty Professor at the Tamil Nadu Veterinary and Animal Sciences University (TANUVAS) and practicing Senior Veterinarian & Co-founder of The Ark Veterinary Clinic, Chennai & The President of the Chennai Small Animal Veterinarians Association (CSAVA)
